

WHAT'S IN THIS ISSUE

Moisture-Proofing is a Must!

PUT A STOP TO MOISTURE PENETRATION WITH NCH!

Rainfall is highly unpredictable. And when your infrastructures are unprotected and not well-maintained, rainwater can seep into your buildings and facilities. This creates an environment suited for moisture buildup and accumulation, which could adversely affect your businesses in numerous ways.

1) Visible Moisture Damage in Buildings

Without proper moisture control, materials and components in your buildings can suffer from extreme physical damage that cannot be repaired with a simple paint job. Such moisture damage manifests in long-term discoloration and disintegration caused by the presence of leaks, condensation, corrosion, and paint blisters.

Prolonged dampness in affected areas could also contribute to widespread mold and bacteria growth, pest inhabitation, thermal insulation reduction, and other moisture problems that are not immediately noticeable.

2) Significant Health Implications

Exposure to damp indoor spaces and moldy environments poses a significant risk to the health, well-being, and overall comfort of your constituents. Poor workplace conditions due to moisture damage could trigger a wide range of respiratory illnesses, including but not limited to asthma, coughing, wheezing, dyspnea, along with nasal and throat infections.

DID YOU KNOW?

Your guide to the latest industry trends, ideas and solutions

PROTECT YOUR PREMISES WITH PROPER MOISTURE-PROOFING

Despite them being difficult to deal with, moisture problems are still very much preventable. NCH offers ideal, top-notch solutions to combat moisture penetration and intrusion in your infrastructures.

NCH sealants, coatings, and adhesives can be applied to a variety of surfaces such as concrete, brick, mortar, cement, stone and tiling, and are designed to protect your spaces from water leaks and moisture buildup. Our specialty maintenance lubricants, repair compounds, and self-fusing tape also provide excellent resistance to moisture, as well as heavy loads and pressure brought about by extreme weather conditions.

Don't wait until your facilities are already suffering from the detrimental effects of moisture damage. Moisture-proof your buildings by reaching out to an NCH representative today!

ABOUT NCH

NCH Asia Pacific exists because of its customers. With the latest technology, industry expertise, and quality solutions, we have the tools to best understand our customer requirements.

NCH Asia Pacific is one of the largest divisions of NCH Corporation, a U.S. based multinational company. NCH has a presence in 50 countries and a network of over 8,500 sales staff.

We clean and conserve water, save energy, and deliver best-in-class maintenance solutions, with a focus on industrial and commercial businesses in Asia.

At NCH Asia Pacific, we believe in "people doing business with people." We have developed and continue to grow a direct sales team to build customer connections, enhance our customer understanding, and drive market penetration.
